PS
EXPERIENCE

Blog Application with Authentication

Company Name

📅 06/2024   📍 Location

- Developed the front-end using React, creating a responsive and intuitive user interface
- Implemented user authentication and authorization using Appwrite, ensuring secure access to the application
- Managed the backend entirely with Appwrite, handling data storage, retrieval, and user management efficiently
- Utilized Redux for state management to ensure consistent and predictable application state
- Developed the front-end using React, ensuring a responsive design that works seamlessly across desktops, tablets, and mobile devices
- Implemented real-time exchange rate fetching using an external API for accurate currency conversions
- Added swap functionality to quickly interchange source and target currencies
- Supported multiple global currencies to cater to a diverse user base
